*² *See RfC for further details.*

Important Notes for Service Pack 3.x6A8!

General

> This release must be installed in Citrix on:
>   - Any needed environment
>   - The "Xpert Test" environment
> The environments which are going to receive this release must fulfil the 3.x6A7*ᴬ requirement AND fulfil the PMD 4.11 requirement.
> (The SQL database must be consistent with the 3.x6A7*ᴬ release of the application AND be consistent with the PMD 4.11 release.)
> (Please refer to previous release notes if a database is in a different format.)

Online

> This procedure must be followed on each server.
> Please verify that nobody is connected or will try to connect to the application while completing this procedure.

1	On the SQL server end:
	On the QuickSales database, run the "`QuickSalesV386_Online_20110222_SQL_Update.sql`"*[B] script.

2	In the QuickSales "`application`" folder:
	Update the application EXEs:

- Remove any previous patches that may be present ("`QuickSales.WDL.xxx`", "`QSPM.WDL.xxx`").
- Remove any previous scripts that may be present ("`QSPMScript.sqs`", "`Script.sqs`").
- Execute the "`QS_V38_SEN_Online_Update.exe`"*[B] in the application folder of the corresponding database updated above.
- Copy the "`qsupdt.xml.blk`"*[C] file to the "`QSFolder`" folder.

3	In the QuickSales "`QSFolder`" folder:

- Remove any previous scripts that may be present ("`QSPMScript.sqs`", "`Script.sqs`").
- Copy the "`QSUpdtInstall.exe`"*[B] in the "`GenExe\Reference`" folder (replace the one that already exists).
- Copy the "`QSPMUpdtInstall.exe`"*[B] in the "`GenExe\Reference`" folder (replace the one that already exists).

4	In the QuickSales "`DataFolder`" folder:

- Rename all the "`DB_Journal.*`" files to "`<yyyymmdd>_DB_Journal.*`" (for example: "20110321_DB_Journal.*").
- Copy the "`DB_Version.*`"*[B] file (replace the one that already exist).

Offline

➢ The release is distributed via the update process.

1	Execute the online QSPM:

- Log in with user "`Release`".
- Click on "`Prepare Update`" / "`Common Files`".

1. Delete the entries in the Common Files tab except the "`sora.ini`" and the "`SCO_Reports.WDL`" entries.
2. Add the "`QSUpdtInstall.exe`"*[B] file.
   Select "`<REP>\`" as "Destination Folder".
3. Add the "`QSPMUpdtInstall.exe`"*[B] file.
   Select "`<REP>\`" as "Destination Folder".

➢ Wait for the completion of point 1 above before proceeding.

2	**An update must be prepared**: • Click on "Prepare Update" / "Prepare Update". • Once done, close the session.
	➢ Wait for the completion of point 2 above before proceeding.
3	Offline users can log into QSBW and wait for the "new update available" message. When the automatic update has not been activated for users, they must click on "Setup ⇨ Update".

✱^A *Refer to previous release notes for further information.*

✱^B *File can be found in the source zip file (3x6A8.zip).*

✱^C *Files or folder must be copied, not moved.*
